

RIDE ON BRUSHCUTTER BLADES

Canycom's unique IAI blades mount easily onto the blade carrier without requiring any tools!

This makes replacing the blades easier - you don't even have to get under the units.

The IAI blades are not ordinary blades either, made from extremely resilient Japanese sward steel, guaranteed to give you a long cutting life in the most extreme conditions.

Easy to replace

Normal / IAI (Pink) **No tools are necessary**

- Even top ends of blade is worn, inner blade can cut brush
- Able to cut brush in a fixed position
- Suitable for cutting tough grass

movie to set blade
